

Methods of test for petroleum and its products —

**Part 156: Determination of hydrocarbon
types in petroleum products —
Fluorescent indicator adsorption
method
(Identical with IP 156:2005)**

ICS 75.080

National foreword

This British Standard reproduces verbatim IP 156:2005 and implements it as the UK national standard. It supersedes BS 2000-156:1997 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee PT/13, Petroleum testing and terminology, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Energy Institute, under the brand of IP publishes and sells all parts of BS 2000, and all BS EN petroleum test methods that would be part of BS 2000, both in its annual publication “Standard methods for analysis and testing of petroleum and related products and British Standard 2000 parts” and individually.

Further information is available from:

**Energy Institute, 61 New Cavendish Street, London W1G 7AR.
