

**BS 2000 :
Section 71.2 :
1995
ISO 3105 : 1994**

Methods of test for

Petroleum and its products

Part 71. Kinematic viscosity

**Section 71.2 Specifications and operating
instructions for glass capillary kinematic
viscometers**

Foreword

This British Standard was published under the authority of the Materials and Chemicals Sector Board and comes into effect on 31 March 1995. It is identical with ISO 3105 : 1994, prepared by Technical Committee 28, Petroleum products and lubricants, of the International Organization for Standardization (ISO).

This British Standard supersedes BS 2000 : Part 71 : 1990, which is withdrawn.

BS 2000 comprises a series of test methods for petroleum and its products that are published by the Institute of Petroleum (IP) and have been accorded the status of a British Standard. Each method should be read in conjunction with the preliminary pages of 'IP Standard methods for analysis and testing of petroleum and related products' which gives details of the BSI/IP agreement for publication of the series, provides general information on safety precautions, sampling and other matters, and lists the methods published as Parts of BS 2000.

The numbering of the Parts of BS 2000 follows that of the corresponding methods published in 'IP Standard methods for analysis and testing of petroleum and related products'. Under the terms of the agreement between BSI and the Institute of Petroleum, the revised version of BS 2000 : Section 71.2 will be published by the IP (in 'Standard methods for analysis and testing of petroleum and related products' and as a separate publication). ISO 3105 was not published in time for insertion in the 1995 edition of 'Standard methods for analysis and testing of petroleum and related products'. A proof copy of ISO 3105 was inserted as an interim measure with the intention to replace this with the published version in 1996. However, as far as we are aware, there were no changes made to the proof copy of ISO 3105 before publication, and therefore BS 2000 : Section 71.2 : 1995 is thus identical with IP 71 Section 2/95.

Part 71 is divided into two sections as follows:

- | | |
|--------------|---|
| Section 71.1 | Petroleum products - Transparent and opaque liquids - Determination of kinematic viscosity and calculation of dynamic viscosity (ISO 3104 : 1994) |
| Section 71.2 | Specifications and operating instructions for glass capillary kinematic viscometers (ISO 3105 : 1994) |

Compliance with a British Standard does not of itself confer immunity from legal obligations.
