

Methods for the sampling and analysis of tin and tin alloys —

Part 21: Determination of high cadmium content of soft solders

UDC 669.654:543.24:546.48

Confirmed January 2011

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Non-ferrous Metals Standards Committee (NFE/-) to Technical Committee NFE/27 upon which the following bodies were represented:

- Association of British Pewter Craftsmen
- British Steel Industry
- Electric Cable Makers' Confederation
- Electronic Engineering Association
- Federation of Wire Rope Manufacturers of Great Britain
- International Tin Research Institute
- London Metal Exchange
- Metal Packaging Manufacturers' Association
- National Coal Board
- Solder Makers' Association
- Coopted members

The following bodies were also represented in the drafting of the standard, through subcommittees and panels:

- British Association for Brazing and Soldering
- BNF Metals Technology Centre
- British Telecom
- Ministry of Defence
- Telecommunication Engineering and Manufacturing Association (TEMA)

This British Standard, having been prepared under the direction of the Non-ferrous Metals Standards Committee, was published under the authority of the Board of BSI and comes into effect on 31 October 1983
