
British Standard Method for

Determination of dimensional changes of fabrics induced by cold-water immersion

[ISO title: Textiles — Determination of dimensional changes of fabrics induced by cold-water immersion]

Méthode de détermination des variations dimensionnelles des étoffes lors de leur immersion dans l'eau froide

Verfahren zur Bestimmung der Maßänderung von textilen Flächengebilden, die durch Eintauchen in kaltes Wasser verursacht wird

National foreword

This British Standard has been prepared under the direction of the Textiles and Clothing Standards Committee and forms a revision of the first edition published in 1971 which is withdrawn.

This standard is identical with ISO 7771 'Textiles — Determination of dimensional changes of fabrics induced by cold-water immersion', published in 1985 by the International Organization for Standardization (ISO).

Terminology and conventions. The text of the international standard has been approved as suitable for publication as a British Standard without deviation. Some terminology and certain conventions are not identical with those used in British Standards; attention is drawn especially to the following.

The comma has been used as a decimal marker. In British Standards it is current practice to use a full point on the baseline as the decimal marker.

Wherever the words 'International Standard' appear referring to this standard, they should be read as 'British Standard'.

Cross-references

International standard	Corresponding British Standard
ISO 139-1973	BS 1051 : 1981 Glossary of terms relating to the conditioning, testing and mass determination of textiles (Technically equivalent*)
ISO 3759-1984	BS 4931 : 1973 Procedure for the preparation, marking and measuring of fabric specimens and garments in tests for assessing dimensional change (Technically equivalent)

Compliance with a British Standard does not of itself confer immunity from legal obligations.

*This British Standard glossary contains all the relevant information which, in the international standard, is written in terms of requirements.
