

Methods of test for

Aluminium fluoride for industrial use —

Part 8: Determination of sulphate content

Methods of test for

Cryolite —

Part 11: Determination of sulphate content

[ISO title: Cryolite, natural and artificial, and aluminium fluoride for industrial use — Determination of sulphate content — Barium sulphate gravimetric method]

UDC 661.8:555.634 + 661.862.362:546.226

Cooperating organizations

The Chemicals Standards Committee, under whose direction these British Standards were prepared, consists of representatives from the following Government departments and scientific and industrial organizations:

- Association of Fatty Acid Distillers
- British Tar Industry Association
- Chemical Industries Association*
- Chemical Society, Analytical Division*
- Consumer Standards Advisory Committee of BSI
- Department of Health and Social Security
- Department of Industry (Laboratory of the Government Chemist)
- Fertiliser Manufacturers' Association Ltd.
- Hydrocarbon Solvents Association
- Ministry of Agriculture, Fisheries and Food
- Ministry of Defence
- National Sulphuric Acid Association
- Paintmakers' Association of Great Britain Ltd.
- Royal Institute of Public Health and Hygiene
- Soap and Detergent Industry Association
- Standardization of Tar Products Tests Committee

The organizations marked with an asterisk in the above list, together with the following, were directly represented on the committee entrusted with the preparation of these British Standards:

- Aluminium Federation
- British Ceramic Research Association
- Royal Institute of Chemistry

These British Standards, having been prepared under the direction of the Chemicals Standards Committee, were published under the authority of the Executive Board and come into effect on 31 December 1980
