Foreword

This British Standard has been prepared under the authority of the Textile Divisional Council. It is identical with International Standard ISO 2646 'Wool – Measurement of the length of fibres processed in the worsted system, using a fibre diagram machine', published by the International Organization for Standardization.

For the purposes of this British Standard, the text of ISO 2646 given in this publication should be modified as follows.

Terminology. The words 'British Standard' should replace 'International Standard' wherever they appear.

Cross references. The references to other ISO standards should be replaced by references to British Standards as follows:

Reference to International Standard	Appropriate British Standard
ISO 139 Textiles – Standard atmospheres for conditioning and testing	BS 1051 Glossary of terms relating to the conditioning and testing of textiles
