British Standard Specification for One-part gun grade polysulphide-based sealants

Mastics monocomposants à base de polysulfure, extrudables au pistolet — Spécifications

Spritzbare Einkomponenten-Dichtmittel auf Polysulfidbasis

British Standards Institution

BS 5215 : 1986

Foreword

This revision of this British Standard has been prepared under the direction of the Elements and Components (of Diverse Materials) for Buildings Standards Committee and supersedes BS 5215 : 1975, which is withdrawn. In this revision two alternative curing conditions have been introduced and, where appropriate, cross-references to BS 3712 have replaced detailed descriptions of test methods. Other minor alterations have been made to bring the standard into line with BS 4254 and BS 5889.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
