National foreword

This Part of BS 5750, having been prepared under the direction of the Quality, Management and Statistics Standards Committee, supersedes BS 5750 : Part 2 : 1979, which is withdrawn. It is identical with ISO 9002-1987 'Quality systems — Model for quality assurance in production and installation', published by the International Organization for Standardization (ISO).

The requirements of this standard are very similar to those of BS 5750 : Part 2 : 1979, but a small number of additional quality system elements have been included, and other elements enhanced. This was mainly because the UK had proposed them in the light of the UK user experience with BS 5750 : Part 2 : 1979. Consequently it was agreed that this revision of BS 5750 : Part 2 should be identical with ISO 9002 in the interests of international harmonization and international trade. BS 5750 : Part 2 : 1979 also called up requirements in BS 5781 : Part 1, however all of these requirements are considered to be incorporated into ISO 9002. Guidance on implementation is given in BS 5750 : Part 5.*

* **Terminology and conventions.** The text of the international standard has been approved as suitable for publication as a British Standard without deviation. Some terminology and certain conventions are not identical with those used in British Standards; attention is drawn especially to the following.

Wherever the words 'International Standard' appear, referring to this standard, they should be read as 'Part of BS 5750'.
