

Methods for measurement of

Fluid flow in closed conduits, using tracers —

Part 1: Measurement of water flow —

Section 1.5 Transit time method using radioactive tracers

[ISO title: Measurement of water flow in closed conduits —
Tracer methods —
Part VII: Transit time method using radioactive tracers]

UDC 532.542:532.574.8.082.25:539.16

Confirmed January 2008

Cooperating organizations

The Industrial-process Measurement and Control Standards Committee, under whose direction this British Standard was prepared, consists of representatives from the following Government department and scientific and industrial organizations:

British Gas Corporation
 British Industrial Measuring and Control Apparatus Manufacturers' Association
 British Steel Corporation
 CBMPE (Council of British Manufacturers of Petroleum Equipment)
 Control and Automation Manufacturers' Association (BEAMA)
 Department of Industry (Computers Systems and Electronics)
 Electrical, Electronic, Telecommunications and Plumbing Union
 Electricity Supply Industry in England and Wales*
 Electronic Engineering Association
 Engineering Equipment Users' Association*
 Institute of Measurement and Control
 Institution of Electrical Engineers
 Institution of Gas Engineers
 Oil Companies Materials Association
 Post Office Engineering Union
 Scientific Instrument Manufacturers' Association
 Sira Institute

The organizations marked with an asterisk in the above list, together with the following, were directly represented on the committee entrusted with the preparation of this British Standard:

Department of Energy (Gas Standards)
 United Kingdom Atomic Energy Authority

This British Standard, having been prepared under the direction of the Industrial-process Measurement and Control Standards Committee, was published under the authority of the Executive Board and comes into effect on 31 March 1980
