National foreword

This Part of BS 5929 has been prepared under the direction of the Food and Agriculture Standards Committee. It is identical with ISO 6564-1985 'Sensory analysis — Methodology — Flavour profile methods' published by the International Organization for Standardization (ISO) and in the preparation of which the United Kingdom played a full part.

Terminology and conventions. The text of the international standard has been approved as suitable for publication as a British Standard without deviation. Some terminology and certain conventions are not identical with those used in British Standards; attention is drawn especially to the following.

Wherever the words 'International Standard' appear, referring to this standard, they should be read as 'British Standard'.

Cross-reference

International standard	Corresponding British Standard
ISO 6658-1985	BS 5929 Methods for sensory analysis of food Part 1 : 1986 General guide to methodology (Identical)

Additional information. The various Parts of ISO 5492 which are referred to in clause 3 are being published in a single classified form and it is intended that the resulting international standard will be published as an identical (dual-numbered) revision of BS 5098 : 1975 'Glossary of terms relating to sensory analysis of food'. In the mean time the Technical Committee has reviewed the provisions of ISO 5492 and finds it suitable for use in conjunction with this Part of BS 5929 for the definitions of any terms not given in BS 5098. ISO 5492/6, indicated in clause 2 as at the stage of draft, has been published.

Textual error. When adopting the text of the international standard, the textual error given below was discovered. It has been marked in the text and has been reported to ISO in a proposal to amend the text of the international standard.

Delete the last line of 9.3.2 and substitute 'multivariate analysis'.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
