

Building and civil engineering — Vocabulary —

Part 1: General terms

ICS 01.040.91; 01.040.93; 91.010.01; 93.010

National foreword

This British Standard reproduces verbatim ISO 6707-1:2004 and implements it as the UK national standard. It supersedes BS 6100-1:1999, which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee B/500, Basic data, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Additional information

BS 6100-1 provides a vocabulary of general terms for the building and civil engineering industry. Even though it is the national implementation of ISO 6707-1, it is dual numbered as BS 6100-1 and BS ISO 6707-1 to link it in with other parts of BS 6100 that contain terms for more specialized areas of building and civil engineering.

This revision of BS 6100-1 implements the 2004 edition of ISO 6707-1, which has been technically revised to include up-to-date terminology used in the building and civil engineering industry.

The layout of this vocabulary is designed in accordance with ISO 10241¹⁾ with terms arranged in a classified order and numbered in accordance with ISO 2145²⁾.

A general introduction to and explanation of the BS 6100 vocabulary is given in BS 6100-0, which provides an alphabetical index of all the terms in all parts of BS 6100.

NOTE BS 6100-1 contains its own index, however, other parts of BS 6100 do not as it is intended that the overriding index, BS 6100-0, will be used instead. For ease of use it is intended that BS 6100-0 will be available on CD ROM.
