Loading for buildings —

Part 2: Code of practice for wind loads

ICS 91.080.01

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by Technical Committee B/525, Buildings and civil engineering structures, to Subcommittee B/525/1, Actions (loadings) and basis of design, upon which the following bodies were represented:

- British Constructional Steelwork Association Ltd.
- British Iron and Steel Producers' Association
- British Masonry Society
- Concrete Society
- Department of the Environment (Building Research Establishment)
- Department of the Environment (Property and Buildings Directorate)
- Department of Transport (Highways Agency)
- Institution of Structural Engineers
- National House-building Council
- Royal Institute of British Architects
- Steel Construction Institute

This British Standard, having been prepared under the direction of the Building and Civil Engineering Sector Board, was published under the authority of the Standards Board and comes into effect on 15 July 1997
