
British Standard

Narrow fabrics

Part 4. Specification for woven elastic
webbings containing natural rubber

Confirmed November 2011

Foreword

This Part of BS 7141 has been prepared under the direction of the Textiles and Clothing Standards Policy Committee. It supersedes BS 1897 : 1971 and BS 4270 : 1974 which are withdrawn, and also incorporates additional fabrics, principally for use in the public sector.

Cross-references are given in appendix A. Information specifically requested by the Ministry of Defence and which was previously contained in Defence Standards is given in appendix B. Appendix C gives additional recommendations, these being product properties which are desirable but which with present technology cannot be specified.

Other Parts of this British Standard are as follows:

- Part 1* Specification for polyamide and polyolefin woven tapes and webbings
- Part 2* Specification for cotton webbings for personal load carrying purposes
- Part 3 Specification for wool tapes
- Part 5 Specification for elastic flat braids containing natural rubber
- Part 6 Specification for laces for boots, shoes and other purposes

Product certification. Users of this British Standard are advised to consider the desirability of third party certification of product conformity with this British Standard based on testing and continuing surveillance, which may be coupled with assessment of a supplier's quality systems against the appropriate Part of BS 5750.

Enquiries as to the availability of third party certification schemes will be forwarded by BSI to the Association of Certification Bodies. If a third party certification scheme does not already exist, users should consider approaching an appropriate body from the list of Association members.

Compliance with a British Standard does not of itself confer immunity from legal obligations. In particular, attention is drawn to The Textile Products (Indications of Fibre Content) Regulations S.I. 1986 No. 26.

*In preparation.
