

Three phase oil-immersed distribution transformers, 50 Hz, from 50 to 2500 kVA with highest voltage for equipment not exceeding 36 kV —

**Part 4: Determination of the power
rating of a transformer loaded with
non-sinusoidal currents —**

**(Implementation of CENELEC
HD 428.4 S1)**

UDC 621.314.212:621.3.025.3

Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee PEL/14, Power transformers, upon which the following bodies were represented:

- Association of Consulting Engineers
- BEAMA Ltd. (Transmission and Distribution Association)
- British Cable Makers Confederation
- British Pump Manufacturers' Association
- British Railways Board
- Electricity Association
- Institution of Plant Engineers
- Transmission and Distribution Association (BEAMA Ltd)

This British Standard, having been prepared under the direction of the Electrotechnical Sector Board, was published under the authority of the Standards Board and comes into effect on 15 October 1995
