

Low-voltage fuses —

Part 3: Supplementary requirements for fuses for use by unskilled persons (fuses mainly for household or similar applications) — Examples of standardized systems of fuses A to F

ICS 29.120.50

National foreword

This British Standard is the UK implementation of HD 60269-3:2007. It is derived from but not identical with IEC 60269-3:2007. It supersedes BS 1361:1971 which will be withdrawn on 1 March 2010. Together with BS 88-1:2007 it supersedes BS EN 60269-3:1995 which will be withdrawn on 1 March 2010.

This standard is part of a restructured series of British Standards for Low Voltage Fuses. These cover the related parts and examples of systems of fuses given in the associated IEC 60269:2006 series of standards.

These restructured British Standards together with their IEC counterparts are:

BS 88-1:2007 — *General requirements* (IEC 60269-1)
BS 88-2:2007 — *Supplementary requirements for fuses for use by authorized persons (fuses mainly for industrial application)* (IEC 60269-2, Fuse systems E, G and I)
BS 88-3:2007 — *Supplementary requirements for fuses for use by unskilled persons (fuses mainly for household and similar applications)* (IEC 60269-3, Fuse system C)
BS 88-4:2007 — *Supplementary requirements for fuse-links for the protection of semiconductor devices* (IEC 60269-4)

This standard covers the following British Fuse system that is included in HD 60269-3:2007:

Fuse system C — Cylindrical fuses (BS cylindrical fuse system)

The text for BS 88-3:2007 has been extracted from IEC 60269-3:2006 and is identical to the text for Fuse system C. However, wherever a reference is made to IEC 60269-1 in the text this should be taken as a reference to BS 88-1 (BS EN 60269-1).

The UK participation in its preparation was entrusted to Technical Committee PEL/32, Fuses.

A list of organizations represented on PEL/32 can be obtained on request to its secretary.
