

Heat resisting steels and nickel alloys

The European Standard EN 10095:1999 has the status of a
British Standard

ICS 77.140.10

National foreword

This British Standard is the English language version of EN 10095:1999. It supersedes BS 1449-2:1983, which is withdrawn, and the requirements for heat resisting steel 310S S31 detailed in BS 970-1 (Section 5):1996

The two steel specifications which were listed BS 1449-2 may be cross-referenced with their equivalents in BS EN 10095 as follows:

Steels in BS 1449-2		Nearest equivalent steel in BS EN 10095	
309S24	Cr Ni 23/14	X12CrNi23-13	1.4833
310S24	Cr Ni 24/20	X8CrNi25-21	1.4845

The UK participation in its preparation was entrusted to Technical Committee ISE/30, Stainless steels, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 26, an inside back cover and a back cover.
