

Methods of test for mortar for masonry —

Part 17: Determination of water-soluble chloride content of fresh mortars

The European Standard EN 1015-17:2000, with the incorporation of amendment A1:2004, has the status of a British Standard

ICS 91.080.30; 91.100.10

National foreword

This British Standard is the official English language version of EN 1015-17:2000, including amendment A1:2004, which is included in a package of new European Standards being prepared by CEN/TC 125 relating to mortar for masonry. No British Standard is superseded.

The UK participation in its preparation was entrusted by Technical Committee B/519, Masonry and associated tests, to Subcommittee B/519/2, Mortar, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
