

Methods of test for mortar for masonry —

Part 6: Determination of bulk density of fresh mortar

The European Standard EN 1015-6:1998, incorporating amendment A1:2006, has the status of a British Standard

ICS 91.100.10

National foreword

This British Standard was published by BSI. It is the UK implementation of EN 1015-6:1998, incorporating amendment A1:2006. It is included in a package of standards that supersedes BS 4551-1, *Methods of testing mortars, screeds and plasters — Part 1: Physical testing*, which is withdrawn.

The start and finish of text introduced or altered by amendment is indicated in the text by tags **A1** **A1**. Tags indicating changes to CEN text carry the number of the CEN amendment. For example, text altered by CEN amendment A1 is indicated by **A1** **A1**.

The UK participation in its preparation was entrusted by Technical Committee B/519, Masonry and associated testing, to Subcommittee B/519/2, Mortar.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

This British Standard, having been prepared under the direction of the Sector Committee for Building and Civil Engineering, was published under the authority of the Standards Committee and comes into effect on 15 February 1999
