

Plastics piping systems for underground drainage and sewerage under pressure — Glass-reinforced thermosetting plastics (GRP) based on unsaturated polyester resin (UP) —

Part 1: General

The European Standard EN 1115-1:1997 has the status of a British Standard

ICS 23.040.01

National foreword

This British Standard is the official English language version of EN 1115-1:1997.

The UK participation in its preparation was entrusted by Technical Committee PRI/88, Plastic piping systems, to Subcommittee PRI/88/2, Pressure, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Additional information

The UK committee involved in the preparation of BS EN 1115-1 has raised concerns about the publication of this standard. The UK opposition is largely due to the lack of consideration given to the fundamental production specifications, which has led the committee to question the usability of this standard.

Cross-references

The British Standards which implement international or European publications may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

This British Standard, having been prepared under the direction of the Sector Committee for Materials and Chemicals, was published under the authority of the Standards Committee and comes into effect on 15 June 2001
