

Fixed firefighting systems — Powder systems —

Part 2: Design, construction and maintenance

The European Standard EN 12416-2:2001, incorporating amendment A1:2007, has the status of a British Standard

ICS 13.220.10

National foreword

This British Standard is the UK implementation of EN 12416-2:2001, incorporating amendment A1:2007. It supersedes BS 5306-7:1998 which is withdrawn.

The UK participation in its preparation was entrusted by Technical Committee FSH/18, Fixed firefighting systems, to Subcommittee FSH/18/8, Powder systems.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

EN 12416-2 is a candidate “harmonized” European Standard and fully takes into account the requirements of the European Commission mandate M/109, *Fire alarm/detection, fixed firefighting, fire and smoke control and explosion suppression products*, given under the EU Construction Products Directive (89/106/EEC), and intended to lead to CE marking. The date of applicability of EN 12416-2 as a “harmonized” European Standard, i.e. the date after which this standard may be used for CE marking purposes, is subject to an announcement in the *Official Journal of the European Communities*.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

This British Standard was published under the authority of the Standards Committee and comes into effect on 15 August 2001
