

BSI Standards Publication

**Child use and care articles —
Method for determining the
release of N-nitrosamines and
N-nitrosatable substances from
elastomer or rubber teats and
soothers**

National foreword

This British Standard is the UK implementation of EN 12868:2017. It supersedes BS EN 12868:1999 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee CW/1/4, Feeding, drinking and mouthing.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
