

Shell boilers —

Part 8: Requirements for safeguards against excessive pressure

The European Standard EN 12953-8:2001 has the status of a
British Standard

ICS 27.060.30; 27.100

National foreword

This British Standard is the official English language version of EN 12953-8:2001, including Corrigendum May 2002. It partially supersedes BS 2790:1992 and BS 1894:1992 which will be withdrawn when Parts 1, 2, 3, 4, 5, 6 and 9 of BS EN 12953 are published.

The UK participation in its preparation was entrusted to Technical Committee PVE/16, Shell boilers, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Additional information

The United Kingdom voted against the acceptance of this European Standard at the Formal Vote stage. The principal UK objections have been resolved by the issue of Corrigendum No. 1.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

This British Standard, having been prepared under the direction of the Engineering Sector Policy and Strategy Committee, was published under the authority of the Standards Policy and Strategy Committee on 24 May 2002
