

# Fireworks —

## Part 5: Batteries and combinations — Specification and test methods

The European Standard EN 14035-5:2006 has the status of a British Standard

ICS 71.100.30

# National foreword

This British Standard was published by BSI. It is the UK implementation of EN 14035-5:2006. It partially supersedes BS 7114-2:1988 and BS 7114-3:1988, which have been declared obsolescent.

NOTE BS 7114-2:1988 and BS 7114-3:1988 are cited in The Fireworks (Safety) Regulations 1997.

The UK participation in its preparation was entrusted to Technical Committee CII/47, Fireworks.

A list of organizations represented on this committee can be obtained on request to its secretary.

The United Kingdom, as a member of CEN, is obliged to publish EN 14035-5 as a British Standard. However, attention is drawn to the fact that the United Kingdom voted against the approval of EN 14035-5.

One of the main reasons for this disapproval is that BSI Committee CII/47 considers that Figure 4 in 9.6 is misleading because various elements of the figure are too small. The BSI Committee is of the opinion that if a transparent template is used to check type sizes on labelling, the template should be produced to a level of accuracy that will permit the height of each character and symbol on the template to be within  $^{+0.1}_0$  mm of the relevant minimum height specified in this standard.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

**Compliance with a British Standard cannot confer immunity from legal obligations.**

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 31 May 2007
