

Underground fire hydrants

The European Standard EN 14339:2005 has the status of a
British Standard

ICS 13.220.10; 93.080.30

National foreword

This British Standard is the official English language version of EN 14339:2005. It partially supersedes BS 750:1984 which will be withdrawn on publication of the revised version which is in progress.

The revision of BS 750 will specify the national operational and health and safety requirements that are necessary for underground fire hydrants to conform to BS EN 14339. It will also include specific national requirements not included in BS EN 14339, including requirements for surface box frames and covers.

The UK participation in its preparation was entrusted by Technical Committee FSH/17, Fire brigade equipment, to Subcommittee FSH/17/1, Hydrants, hydrant systems, couplings and indicator plates, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
