

Fixed ladders for manholes

The European Standard EN 14396:2004 has the status of a
British Standard

ICS 97.145

National foreword

This British Standard is the official English language version of EN 14396:2004. EN 14396 is a candidate “harmonized” European Standard and fully takes into account the requirements of the European Commission mandate M118 “Waste water engineering products”, given under the EU Construction Products Directive (89/106/EEC), and intended to lead to CE marking. The date of applicability of EN 14396 as a harmonized European Standard, i.e. the date after which this standard may be used for CE marking purposes, is subject to an announcement in the *Official Journal of the European Communities*.

There are no national product standards that will be affected by the publication of this standard. However, when specifying ladders for manhole access and egress reference should be made to National Annex NB of BS EN 752-3. This national annex contains health and safety recommendations agreed with Health and Safety Executive regarding the use of ladders in manholes. These recommendations were used to determine the minimum sizes of access shafts and chambers advised in the annex and have also been incorporated in other British Standards, for example, to set the distance of the cover opening from the inside wall of precast concrete manholes.

The UK participation in its preparation was entrusted to Technical Committee B/505, Waste water engineering, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 32, an inside back cover and a back cover.
