

Specification for

**Harmonized system of
quality assessment for
electronic
components —
Blank detail
specification —
Relay sockets of
assessed quality**

The European Standard EN 147101:1994 has the status of a
British Standard

National foreword

This British Standard has been prepared under the direction of the Electrotechnical Sector Board, and is the English language version of EN 147101:1994 *Blank detail specification: Relay sockets of assessed quality*, published by the European Committee for Electrotechnical Standardization (CENELEC) Electronic Components Committee (CECC).

The text of this standard consists of the text of EN 147101:1994.

This standard lists the ratings, characteristics and inspection requirements which shall be included as mandatory requirements in any detail specification for this type of relay socket.

Detail specifications shall conform to the requirements of this blank detail specification and BS CECC 00111: *Rule of Procedure 11. Specifications* — Part 4:1991: *Regulations for CECC detail specifications*.

The British Standard which implements the CECC Rules of Procedure is BS 9000: *General requirements for a system for electronic components of assessed quality* — Part 2:1991 *Specification for the national implementation of the CECC system*.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 to 10 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
