Fibre-reinforced plastic composites — Declaration of raw material characteristics

Part 4: Specific requirements for fabrics

National foreword

This British Standard is the UK implementation of EN 16245-4:2013.

The UK national committee is of the opinion that, in all parts of EN 16245, the use of the terms “guaranteed minimum value” and “guaranteed maximum value” is not appropriate within a voluntary-based standard. Furthermore, the absolute “minimum value” and “maximum value” cannot be determined practicably, so that “statistical minimum value” (defined in EN 16245-1) and “statistical maximum value” (calculated in a similar manner using maximal values) are preferred.

The UK participation in its preparation was entrusted to Technical Committee PRI/42, Fibre reinforced thermosetting plastics and prepregs.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
