

BSI Standards Publication

Paints and varnishes — Assessment of emissions of substances from coatings into indoor air — Sampling, conditioning and testing

National foreword

This British Standard is the UK implementation of EN 16402:2013.

BSI, as a member of CEN, is obliged to publish EN 16402 as a British Standard. However, attention is drawn to the fact that the UK committee voted against its approval as a standard in CEN. The UK committee voted against this standard because the information and guidance given in Annex B relating to very volatile organic compounds (VVOCs) is less substantial than that which was issued for CEN Enquiry. For this reason, a negative vote was submitted.

The UK participation in its preparation was entrusted to Technical Committee STI/10, Test methods for paints.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
