Energy performance of buildings

Part 13: Module M4-8 - Calculation of cooling systems - Generation

National foreword

This British Standard is the UK implementation of EN 16798-13:2017. Together with BS EN 16798-9:2017 and PD CEN/TR 16798-14:2017, it supersedes BS EN 15243:2007, which is withdrawn.

BSI, as a member of CEN, is obliged to publish EN 16798-13:2017 as a British Standard. However, attention is drawn to the fact that during the development of this European Standard, the UK committee voted against its approval as a European Standard.

The technical reasoning behind the UK committee's response relates to:

- a) The apparent imposition of specific requirements on National authorities
- b) The lack of guidance in EN 16798-13:2017 on accuracy and justification for the use of Methods 1 and 2 relative to existing simpler alternatives.

Users may wish to consider these issues when specifying products.

The UK participation in its preparation was entrusted to Technical Committee RHE/2, Ventilation for buildings, heating and hot water services.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
