

BS EN 18069:2026

BSI Standards Publication

Water quality — Minimum requirements for the selection, installation, validation, and operation of continuous measuring devices

National foreword

This British Standard is the UK implementation of EN 18069:2026.

The UK participation in its preparation was entrusted to Technical Committee EH/3, Water quality.

A list of organizations represented on this committee can be obtained on request to its committee manager.

The UK committee advises users that a manufacturer’s stated performance and the operational performance of these devices might differ depending on the media being sampled. For example, wastewater with high heterogeneous suspended solids could give differing results.

Contractual and legal considerations
