

Rubber- or plastics-coated fabrics — Low temperature tests

Part 2. Impact test on loop

The European Standard EN 1876-2 : 1997 has the status of a
British Standard

ICS 59.080.40

National foreword

This British Standard is the English language version of EN 1876-2 : 1997. It is an additional method to methods 10A and 10C of BS 3424 : Part 8 : 1983.

Method 10B (low temperature bend test) of BS 3424 : Part 8 : 1983 is superseded by BS EN 1876-1.

The UK participation in its preparation was entrusted to Technical Committee TCI/78, Coated fabrics, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled 'International Standards Correspondence Index', or by using the 'Find' facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 6, an inside back cover and a back cover.

This British Standard, having been prepared under the direction of the Sector Board for Materials and Chemicals, was published under the authority of the Standards Board and comes into effect on 15 March 1998
