

BS EN 2245:2012

BSI Standards Publication

Aerospace series — Pipelines for liquids and gases — Definitions

bsi.

...making excellence a habit.™

National foreword

This British Standard is the UK implementation of EN 2245:2012.

BSI, as a member of CEN, is obliged to publish EN 2245:2012 as a British Standard. However, attention is drawn to the fact that at the Formal Vote stage, the UK committee abstained from voting.

ACE/069 has responsibility for the subject matter of this standard and considers the content of EN 2245:2012 to be inadequate and outdated. In addition, the content conflicts with existing ISO standards such as ISO 6771:2007 and ISO 11639:2010.

The UK participation in its preparation was entrusted to Technical Committee ACE/69, Aerospace hydraulic systems, fluids and components.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
