

Methods of test for petroleum and its products —

**Part 429: Liquid petroleum products —
Petrol — Determination of the benzene
content by infrared spectrometry**

(Identical with IP 429/96)

The European Standard EN 238:1996, with the incorporation of amendment A1:2003, has the status of a British Standard

ICS 75.160.20

National foreword

This British Standard is the official English language version of EN 238:1996 *Liquid petroleum products — Petrol — Determination of the benzene content by infrared spectrometry*, including amendment A1:2003, published by the European Committee for Standardization (CEN).

BS 2000 comprises a series of test methods for petroleum and its products that are published by the Institute of Petroleum (IP) and have been accorded the status of a British Standard. Each method should be read in conjunction with the preliminary pages of “IP Standard methods for analysis and testing of petroleum and related products” which gives details of the BSI/IP agreement for publication of the series, provides general information on safety precautions, sampling and other matters, and lists the methods published as parts of BS 2000.

The numbering of the parts of BS 2000 follows that of the corresponding methods published in “IP Standard methods for analysis and testing of petroleum and related products”. Under the terms of the agreement between BSI and the Institute of Petroleum, BS 2000-429/BS EN 238 will be published by the IP (in “Standard methods for analysis and testing of petroleum and related products” and as a separate publication). BS 2000-429:1996 is thus identical with IP 429/96.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

This British Standard was published under the authority of the Materials and Chemicals Sector Board and comes into effect on 31 July 1996
