

Heating boilers —

Part 4: Heating boilers with forced draught burners — Special requirements for boilers with forced draught oil burners with outputs up to 70 kW and a maximum operating pressure of 3 bar — Terminology, special requirements, testing and marking

The European Standard EN 303-4:1999 has the status of a British Standard

ICS 91.140.10

National foreword

This British Standard is the English language version of EN 303-4:1999, *Heating boilers — Part 4: Heating boilers with forced draught burners — Special requirements for boilers with forced draught oil burners with outputs up to 70 kW and a maximum operating pressure of 3 bar — Terminology, special requirements, testing and marking*, published by the European Committee for Standardization (CEN).

This standard partially supersedes the following British Standards: BS 779:1989 and BS 855:1990. It is important to use this standard if the heating boilers under consideration fall within its scope, as BS 779:1989 and BS 855:1990 will not be valid for such heating boilers. The scope of BS 779:1989 and BS 855:1990 will be amended to state that they are no longer valid for heating boilers falling within the scope of this standard.

The UK participation in its preparation was entrusted to Technical Committee RHE/10, Heating boilers, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
