

BS EN 4686:2014

BSI Standards Publication

Aerospace series — Pipe coupling 8°30' in titanium alloy — Equipped blind ferrules

bsi.

...making excellence a habit.™

National foreword

This British Standard is the UK implementation of EN 4686:2014.

BSI, as a member of CEN, is obliged to publish EN 4686 as a British Standard. However, attention is drawn to the fact that during the development of this European Standard, the UK committee voted against its approval as a European Standard. The UK committee considers that while the technical content of the standard appears to be correct, the title of the standard does not match the common industry terms used for the item described. The items described in the standard are neither couplings nor ferrules, blind or otherwise. The UK committee considers these items to be Removable Blanking Cap Assemblies.

The UK participation in its preparation was entrusted to Technical Committee ACE/69, Aerospace hydraulic systems, fluids and components.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
