

Electrical apparatus for potentially explosive atmospheres — Powder filling “q”

The European Standard EN 50017:1998 has the status of a
British Standard

ICS 29.260.20

National foreword

This British Standard is the English language version of EN 50017:1998. This British Standard supersedes BS EN 50017:1994 which remains current.

The UK participation in its preparation was entrusted to Technical Committee GEL/31, Electrical apparatus for explosive atmospheres, to Subcommittee GEL/31/17, Pressurization and other techniques, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 9 and a back cover.

Amendments issued since publication

Amd. No.	Date	Text affected
