Multi-element metallic cables used in analogue and digital communication and control

Part 11-2: Sectional specification for
un-screened cables, characterized from
1 MHz up to 500 MHz for work area,
patch cord and data centre applications

National foreword

This British Standard is the UK implementation of EN 50288-11-2:2015.

The UK participation in its preparation was entrusted to Technical Committee EPL/46, Cables, wires and waveguides, radio frequency connectors and accessories for communication and signalling.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
