

BSI Standards Publication

Sound system equipment: Headphones and earphones associated with personal music players — Maximum sound pressure level measurement methodology

Part 2: Matching of sets with headphones if either or both are offered separately, or are offered as one package equipment but with standardised connectors between the two allowing to combine components of different manufacturers or different design

National foreword

This British Standard is the UK implementation of EN 50332-2:2013. It supersedes BS EN 50332-2:2003, which will be withdrawn on 23 September 2016.

The UK participation in its preparation was entrusted to Technical Committee EPL/108, Safety of electronic equipment within the field of audio/video, information technology and communication technology.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
