

**Test methods for analysis
of lead in PVC taken from
insulation and sheath of
electric and optical fibre
cables — Method A:
Total lead content
determination with
flame excitation
atomic absorption
spectrometry —
Method B: Qualitative
analysis of lead by lead
sulphide staining**

The European Standard EN 50414:2006 has the status of a
British Standard

ICS 29.035.20

National foreword

This British Standard is the official English language version of EN 50414:2006.

The UK participation in its preparation was entrusted by Technical Committee GEL/20, Electric cables, to Subcommittee GEL/20/17, Low voltage cables, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
