

Rotating electrical machines —

Part 2: Methods for determining losses and efficiency of rotating electrical machinery from tests (excluding machines for traction vehicles)

The European Standard EN 60034-2:1996 together with amendments A1:1996 and A2:1996 has the status of a British Standard

ICS 29.160.01

National foreword

This British Standard is the English language version of EN 60034-2:1996, including amendments A1:1996 and A2:1996. It is identical with IEC 34-2:1972 plus IEC 34-2A:1974, including amendment 1 1995 and amendment 2 1996. It supersedes BS 4999-102:1987, which is withdrawn.

NOTE IEC 34-2A:1974 (first supplement to IEC 34-2:1972) is given in Annex B of EN 60034-2:1996.

Text introduced by amendments A1 and A2 is indicated by a sideline.

The UK participation in its preparation was entrusted to Technical Committee PEL/2, Rotating electrical machinery, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

From 1 January 1997, all IEC publications have the number 60000 added to the old number. For instance, IEC 27-1 has been renumbered as IEC 60027-1. For a period of time during the change over from one numbering system to the other, publications may contain identifiers from both systems.

Cross-references

The British Standards which implement these international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 to 47 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

This British Standard, having been prepared under the direction of the Electrotechnical Sector Board, was published under the authority of the Standards Board and comes into effect on 15 October 1999
