

Eaves gutters and fittings made of PVC-U — Definitions, requirements and testing

The European Standard EN 607:2004 has the status of a British Standard

ICS 01.040.91; 91.060.20

National foreword

This British Standard is the official English language version of EN 607:2004. It supersedes BS EN 607:1996. Together with BS EN 12200-1:2000 and BS EN 1462:2005 it will replace BS 4576-1:1989 which is scheduled for withdrawal in September 2007.

The UK participation in its preparation was entrusted by Technical Committee PRI/88, Plastics piping systems, to Subcommittee PRI/88/1, Plastics piping systems for non-pressure applications, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
