Electromagnetic compatibility (EMC)

Part 4-39: Testing and measurement techniques - Radiated fields
in close proximity - Immunity test (IEC 61000-4-39:2017)

National foreword

This British Standard is the UK implementation of EN 61000-4-39:2017. It is identical to IEC 61000-4-39:2017.

BSI, as a member of CENELEC, is obliged to publish EN 61000-4-39:2017 as a British Standard. However, attention is drawn to the fact that during its development, the UK committee voted against its approval as a European Standard.

The UK Committee believes that the very specific applicability of this standard is not sufficiently emphasized. Attention is drawn to the information contained in the Introduction which provides some assistance in defining applicability.

The UK participation in its preparation was entrusted to Technical Committee GEL/210/11, EMC - Standards Committee.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
