

Connectors for electronic equipment —

**Part 4-107: Printed board connectors
with assessed quality — Detail
specification for shielded two-part
connectors having a basic grid of
2,0 mm, fixed part with solder and
press-in terminations for printed
boards, free part with non-accessible
insulation displacement and crimp
terminations**

The European Standard EN 61076-4-107:2001 has the status of a
British Standard

ICS 31.220.10; 31.180

National foreword

This British Standard is the official English language version of EN 61076-4-107:2001. It is identical with IEC 61076-4-107:2001.

The UK participation in its preparation was entrusted by Technical Committee EPL/48, Connectors for electronic equipment, to Subcommittee EPL/48/2, Electromechanical components for electronic equipment, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

From 1 January 1997, all IEC publications have the number 60000 added to the old number. For instance, IEC 27-1 has been renumbered as IEC 60027-1. For a period of time during the change over from one numbering system to the other, publications may contain identifiers from both systems.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

This British Standard, having been prepared under the direction of the Electrotechnical Sector Policy and Strategy Committee, was published under the authority of the Standards Policy and Strategy Committee on 26 November 2001
