

BS EN 61169-26:2013

BSI Standards Publication

Radio-frequency connectors

Part 26: Sectional specification for TNCA
series RF coaxial connectors

National foreword

This British Standard is the UK implementation of EN 61169-26:2013. It is identical to IEC 61169-26:2013.

Attention is drawn to the TNCA series connector mating limitation defined in the Scope, where the dielectric of the TNCA extends beyond the reference plane.

Users may also wish to consider a method of distinguishing a TNCA interface from that of a TNCA series connector conforming to EN 61169-17.

The UK participation in its preparation was entrusted to Technical Committee EPL/46, Cables, wires and waveguides, radio frequency connectors and accessories for communication and signalling.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
