

Safety of power transformers, power supply units and similar —

Part 2-5: Particular requirements for shaver transformers and shaver supply units

The European Standard EN 61558-2-5:1998, with the incorporation of amendment A11:2004, has the status of a British Standard

ICS 29.180

National foreword

This British Standard is the English language version of EN 61558-2-5:1998, including amendment A11. It is identical with IEC 61558-2-5:1997.

The BS EN 61558 series of standards will ultimately supersede BS 3535-1, dual numbered as BS EN 60742:1996, and BS 3535-2. Until that time arrives, these latter standards are only to be used for equipment not covered by the BS EN 61558 series.

The UK participation in its preparation was entrusted to Technical Committee PEL/96, Small transformers, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 11 and a back cover.
