

Superconductivity —

Part 9: Measurements for bulk high temperature superconductors — Trapped flux density of large grain oxide superconductors

The European Standard EN 61788-9:2005 has the status of a British Standard

ICS 17.220; 29.050

National foreword

This British Standard is the official English language version of EN 61788-9:2005. It is identical with IEC 61788-9:2005.

The UK participation in its preparation was entrusted to Technical Committee L/-/90, Superconductivity, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 20, an inside back cover and a back cover.
