

Separator systems for light liquids (e.g. oil and petrol) —

Part 1: Principles of product design, performance and testing, marking and quality control

The European Standard EN 858-1:2002, with the incorporation of amendment A1:2004, has the status of a British Standard

ICS 13.060.99

National foreword

This British Standard is the official English language version of EN 858-1:2002, including amendment A1:2004.

EN 858-1:2002 is now a candidate “harmonized” European Standard and fully takes into account the requirements of the European Commission mandate M118, *Wastewater engineering products*, given under the EU Construction Products Directive (89/106/EEC), and is intended to lead to CE marking. The date of applicability of the amended EN 858-1:2002 as a harmonized European Standard, i.e. the date after which this standard may be used for CE marking purposes, is subject to an announcement in the *Official Journal of the European Communities*. The Commission in consultation with Member States have agreed a transition period for the co-existence of harmonized European Standards and their corresponding national standard(s). It is intended that this period will comprise a period, usually nine months after the date of availability of the European Standard, during which any required changes to national regulations are to be made, followed by a further twelve-month period for the implementation of CE marking. At the end of this co-existence period, the national standard(s) will be withdrawn.

EN 858-1 is the subject of transitional arrangements agreed under the Commission mandate. In the UK there are no corresponding national standards. There are no regulations in the UK dealing with reaction to fire of light liquid separators. Therefore the requirements of **6.2.8** and **8.4** are not applicable to separators intended for use in the UK.

The UK participation in its preparation was entrusted to Technical Committee B/505, Wastewater engineering, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.
