Metallic cables and other passive components test methods

Part 4-16: Electromagnetic compatibility (EMC) — Extension of the frequency range to higher frequencies for transfer impedance and to lower frequencies for screening attenuation measurements using the triaxial set-up

National foreword

This British Standard is the UK implementation of EN IEC 62153-4-16:2021. It is identical to IEC 62153-4-16:2021, incorporating corrigendum 1:2023. It supersedes BS IEC 62153-4-16:2016, which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee EPL/46, Cables, wires and waveguides, radio frequency connectors and accessories for communication and signalling.

A list of organizations represented on this committee can be obtained on request to its committee manager.
