

Petroleum and natural gas industries — Cements and materials for well cementing —

Part 2: Testing of well cements

The European Standard EN ISO 10426-2:2003, incorporating amendment A1:2005, has the status of a British Standard

ICS 75.020; 91.100.10

National foreword

This British Standard is the UK implementation of EN ISO 10426-2:2003, incorporating amendment A1:2005 and corrigendum July 2007. It is identical with ISO 10426-2:2003, incorporating amendment 1:2005 and corrigendum June 2006.

The start and finish of text introduced or altered by corrigendum is indicated in the text by tags AC AC. Text altered by ISO corrigendum June 2006 is indicated in the text by AC1 AC1.

The start and finish of text introduced or altered by ISO amendment is indicated in the text by tags A1 A1. Tags indicating changes to ISO text carry the number of the ISO amendment. For example, text altered by ISO amendment 1 is indicated by A1 A1.

The UK participation in its preparation was entrusted by Technical Committee PSE/17, Materials and equipment for petroleum, petrochemical and natural gas industries, to Subcommittee PSE/17/-/3, Drilling and completion fluids and well cements.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

For additional explanatory information please see the National Annex NA at the end of this standard.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.
