

BS EN ISO 1135-4:2015

Incorporating corrigendum February 2016

BSI Standards Publication

Transfusion equipment for medical use

Part 4: Transfusion sets for single use,
gravity feed

bsi.

...making excellence a habit.™

National foreword

This British Standard is the UK implementation of EN ISO 1135-4:2015. Together with BS EN ISO 1135-5:2015, it supersedes BS EN ISO 1135-4:2012 which is withdrawn.

This standard has been technically revised with the following changes:

- the scope has been restricted to gravity feed applications and the whole document aligned accordingly;
- transfusion sets for single use used in conjunction with pressure infusion apparatus are now covered by BS EN ISO 1135-5:2015;
- clause 3.3 "Designation examples" has been deleted;
- clause 7.6 "Assessment of blood component depletion" and clause 7.7 "Assessment of damage to blood components" have been added;
- the Normative references and the Bibliography have been updated;
- some minor editorial changes were introduced in the whole document.

The UK participation in its preparation was entrusted to Technical Committee CH/212, IVDs.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
